

Component[™]

Optimized Calcium with Boron. A One-Two Punch!

Component CaB strengthens the cellular walls, ultimately reducing wear and improving plant resistance to abiotic and biotic stress.

- Ionic Calcium and Boron complexed and chelated to reduce tie up and fixation while remaining highly available to the plant.
- Nutritional Calcium and Boron designed for maximum uptake and plant efficiency
- Calcium nutrition without Sulfate, Chloride or Nitrate baggage
- Boron to assist in Calcium uptake and translocation

Easy to use rate calculation:

Use Rate: 1 to 6 oz/1000 sqft

Pack sizes: 2 x 2.5 gal, 55 gal drum

Application Recommendations:

TURF SPRAY APPLICATION: Apply 1 to 6 ounces of Component CaB per 1,000 sq. ft. every 7 to 14 days in at least 1 gallon of water. Higher rates of 6 to 12 ounces per 1,000 sq. ft. can be used for soil drench applications with at least 3 gallons of water. Apply only as directed.

Guaranteed Analysis

Calcium (Ca) 16.00%

Boron (B)..... 0.50%

Derived From: Calcium carbonate and boric acid

ph 6.3
