

# EMPRUV™ with SOLU-PLUS

EMPRUV™ is intended to supplement and enhance a full fertilization program as recommended in accordance with reliable Soil and Tissue Analysis.

## Application Rates and Guidelines

EMPRUV™ is a "Next Generation" product that is 100% soluble, containing a blend of natural fermentation extracts, microbial metabolites, natural growth promoters, enzyme precursors, and nutrients complexed with an organic and amino acid base to enhance nutrients availability and uptake.

Apply recommended rates in 1 – 3 gallons of water per 1000 ft<sup>2</sup> as a carrier. EMPRUV™ can be applied as a foliar spray early in the morning or evening. Allow foliar spray to dry before irrigation to maximize plant absorption.

 **FOLIAR APPLICATION - COOL AND WARM SEASON TURF:**  
Apply 0.75 to 2.0 oz per 1000 ft<sup>2</sup> bi-weekly or as needed.

 **INJECTION - COOL AND WARM SEASON TURF:**  
Apply 1.0-2.0 qts per acre 10 - 15 minutes before end of irrigation cycle.

Product Compatibility: Due to various types of water quality and fertilizer sources available, it is important to always perform a compatibility test prior to implementing any new tank mix to identify potential issues and/or incompatibilities.
