

DIRECTIONS FOR USE

NutriPath applications are recommended throughout the growing season and are best before plants display signs of stress and moisture penetration is limited. When water quality and soils are extremely poor, best to use NutriPath more frequently to increase performance. Safe and easy to use, NutriPath will not harm or stress turf and has minimal interaction with most tank additives and active formulas.

APPLICATION RATES / INTERVALS

Spray Applications: Apply 16 to 32 ounces of NutriPath per acre weekly to every other week in 1 to 2 gallons of water per acre. For water quality adjustment and flushing, spray 64 to 128 ounces of NutriPath in 2 gallons of water per acre. Follow up with adequate irrigation to move NutriPath into the soil profile. Then irrigate to flush from the profile, as required to reduce salts. Monitor with soil analysis, water samples.

Injection equipment: Apply NutriPath at 32 to 128 ounces per acre weekly to monthly depending on soil analysis and water quality. Consult a Sales Representative or Agronomist when in question about rates.

SHAKE WELL BEFORE USING
