

Photo-Boost™ with SOLU-PLUS

Photo-Boost™ is intended to supplement and enhance a full fertilization program as recommended in accordance with reliable Soil and Tissue Analysis.

Application Rates and Guidelines

Photo-Boost™ is a “Next Generation” product that is super soluble, with an organic and amino acid base to enhance nutrient availability and intake. Use when increased density and/or rooting is desired, especially during low light periods and/or when short days prevail.

Apply recommended rates in 1 – 2 gallons of water per 1000 ft² as a carrier. Photo-Boost should be applied as a foliar spray early in the morning or evening. Allow foliar spray to dry before irrigation to maximize plant absorption.

 **FOLIAR APPLICATION - COOL AND WARM SEASON TURF:**
Apply 3.0-4.5 oz per 1000 ft² weekly or bi-weekly as needed.

Product Compatibility: Due to various types of water quality and fertilizer sources available, it is important to always perform a compatibility test prior to implementing any new tank mix to identify potential issues and/or incompatibilities.
